Chris True (truec@cofc.edu, rm 224 JCLong) in Physics, or

Stacey Hassard (yanagawask@cofc.edu, 224 SSMB) in Geology

Posters take about 20 minutes to print. The amount of time it takes for your poster to come out of the printer depends greatly on how many people are ahead of you and other workload factors.

If your poster needs reprinting due to a problem with the provided file, a new form will be required since that will be considered a second print job.

By putting your name below, the submitting author certifies that all authors have had the opportunity to review the poster and the faculty supervisor verifies that it is approved to be submitted for printing.

Nicholas P Levitt
